

SWASTIK KUMAR MOHANTY

CYBERSECURITY • PENETRATION TESTING • SECURE SOFTWARE DEVELOPMENT

swastikmohanty124@gmail.com | +91-8144585448 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE SUMMARY

Electronics & Instrumentation Engineering graduate with hands-on experience in **penetration testing, vulnerability assessment, and secure software development**. Strong grounding in **OWASP methodology, bug bounty triage, and real client security engagements** across web, mobile, and network attack surfaces.

TECHNICAL SKILLS

Cybersecurity Tools: Nmap, Burp Suite, Metasploit, Bettercap, Wireshark, JADX-GUI, Nuclei, Katana, TruffleHog

Programming: Python, C, Java (Core), JavaScript (ES6)

Web & DevOps: HTML5, CSS3, React.js, Linux (CLI), Git, GitHub, Docker

Databases & Tools: MySQL, VS Code

INTERNSHIPS

Cybersecurity & AI Intern — Jazzee Technologies

Jan 2025 – June 2026

- Assessed an ERP system for Silicon University, identifying weaknesses in **access controls, authentication flows, and data exposure points**.
- Studied **HackerOne** bug bounty reports and **AI-integrated security workflows** to strengthen real-world vulnerability triage skills.

Penetration Testing Intern — AppSecure Security

July 2026 – Sep 2026

- Performed **OWASP-based web application pentesting** across client engagements, identifying **IDOR, CORS, SQL injection, XSS, CSRF, and JWT** issues.
- Conducted Android static analysis (**JADX-GUI**), secrets detection (**TruffleHog**), and attack-surface mapping (**Katana, Nuclei, Nmap**).
- Delivered structured remediation guidance for real client applications and network infrastructure, maintaining strict **confidentiality**.

PROJECTS

Format-Agnostic Log Analytics Engine (Repo)

Jan 2025

- Built a config-driven engine parsing **JSON, YAML, XML, CSV, and plaintext logs** with dynamic schema mapping; containerized with **Docker**.
- Designed a **pluggable parser architecture** with rule-based anomaly detection; presented at the Logile Hackathon.

System Activity Monitoring Tool (Repo)

Jan 2025

- Simulated adversary data collection (Python, **pynput, Fernet, PIL**) with encrypted logging to demonstrate Windows security gaps.
- Compiled findings into a mitigation checklist highlighting endpoint-monitoring detection gaps.

Password Manager (Repo)

Aug 2024

- Built a Python password manager with **Fernet encryption**, JSON storage, and an interactive CLI for secure credential management.
- Implemented master-password-based key derivation and input validation to protect vault integrity.

EDUCATION

Silicon University, Odisha — **B.Tech, Electronics & Instrumentation Engineering | CGPA: 8.34**

2022 – 2026

Kendriya Vidyalaya No.2, Bhubaneswar — **Class XII: 83.34% | Class X: 85.13%**

2020 – 2022

CERTIFICATIONS & TRAINING

NPTEL Gold – Practical Cybersecurity | **Ethical Hacking Bootcamp** – IIIT Bhubaneswar (ISEA Phase-3, MeitY) | **Ethical Hacking** – Z-Security | **MERN Stack Internship** – CodeBeat.

ACHIEVEMENTS & ACTIVITIES

PM SHRI Scholarship Awardee – Ministry of Education | **Logile Hackathon** – Built Log Analytics Engine | **Smart India Hackathon 2024 & HACK-O-12** – Participant | KVS National-level Kho-Kho Player.

SOFT SKILLS

- Problem Solving • Team Collaboration • Adaptability • Versatility • Analytical Thinking
