Projects

Advanced Keylogger ([Repo. Link](#))

Jan 2025

- **Developed a Python-based system monitoring tool** integrating keylogging, clipboard/data capture, audio recording, and screenshot automation, with encrypted data transmission via SMTP.
- Utilized libraries like pynput, Fernet, and PIL to demonstrate cybersecurity vulnerabilities in Windows environments.
- Automated secure logging with multi-module integration for ethical security analysis.

Travelocity Web Application ([Repo. Link](#))

June 2024

- **User Interface (UI):** Developed a responsive and user-friendly interface using React, HTML, and CSS, allowing users to browse travel options like flights, hotels, and car rentals.
- **Component-Based Architecture:** Utilized React's component-based architecture to create reusable UI components, such as search bars, booking forms, and travel listings, ensuring maintainability and scalability.
