PROJECTS

Travelocity Web Application [[View Project](#)] ([Repo. Link](#))

June 2024

- User Interface (UI): Developed a responsive and user-friendly interface using React, HTML, and CSS, allowing users to browse travel options like flights, hotels, and car rentals.
- Component-Based Architecture: Utilized React's component-based architecture to create reusable UI components, such as search bars, booking forms, and travel listings, ensuring maintainability and scalability.

Smart Cafeteria Ordering System ([Repo. Link](#))

Aug 2025

- Designed a Smart Cafeteria Automation System using ESP32 with Bluetooth voice ordering, RFID-based student authentication, and a real-time web dashboard for live order tracking.
- Integrated ERP-linked billing through JSON APIs, enabling automatic student account updates, secure identity-based transactions, and centralized order storage over Wi-Fi.

Console Gaming Website [[View Project](#)] ([Repo. Link](#))

Nov 2025

- Developed and deployed a responsive console gaming showcase website using modern JavaScript tooling with Tailwind CSS and Vite, demonstrating frontend UI skills and real-world project deployment.
- Integrated full web interface with live hosting on Vercel, ensuring fast, scalable delivery and practical experience with cloud deployment workflows.
